

Microsoft devices for Education

Inspiring new ways of teaching,
and learning

Technology is transforming education, and creating new possibilities for education professionals and their pupils. But it's not replacing standard, familiar practices. Traditional tools, like pen and paper, remain a vital part of the learning experience.

Surface empowers educators, giving them new ways to bring lessons to life, engage students and improve the quality of teaching. It builds on familiar and trusted tools too, with innovations such as Surface Pen that feels as natural as pen on paper.

Surface devices free education professionals from their desks, making it easier for them to share ideas with colleagues and subject experts, enhance their own professional development and strengthen learning overall.

Embrace the modern teaching experience

The digital classroom has arrived. Surface gives education professionals the tools they need to make learning interactive and inspiring.

- Ideas come to life with Surface Pen, and students excel. Science scores increase by up to 36% when students think in digital ink.
- Presentations, dissertations and essays are clearer thanks to Surface's HD screens: text reads like the printed page, and images stand out.
- Surface Hub takes group learning to a whole new level as professionals and students come together to collaborate like never before.

90% of teachers say digital inking improves the quality of their curriculum.

Achieve more, away from your desk

Surface provides education professionals with the best elements of a desktop, laptop, and tablet, making it easier for them to move around the classroom, or work wherever their roles take them. One device does more, and flexes to the job in hand. Surface Book has three different configurations: laptop, clipboard, and canvas. Surface Pro 4 quickly converts from a tablet to a laptop.

- Thin, super light, and powerful, Surface gives education professionals access to the facts they need wherever they are. With powerful batteries, it keeps them connected to colleagues and students for longer too.
- Surface Hub opens up a world of learning, as students, teachers and subject experts develop ideas together in real-time.
- The versatility of Surface not only makes work easier, it saves on hardware and IT costs.

"I am trying to create the most powerful teaching and learning environment on the planet. I want to remove constraints. And the Surface absolutely lets us do that."

Rob Baker
Technology Director, Cincinnati Country Day School

Software shown is sold separately.

Collaboration is easier, and more secure

Learning is all about sharing ideas and thinking with students, colleagues and subject experts wherever they're located. Surface devices are intuitive to use, easy to manage and make it easy for people to work together, whatever their geography.

- Share ideas, faster, using the full Office Suite and Windows 10 as well as trusted education apps such as StaffPad and FluidMath.
- Work together in real time with video conferencing, audio and white boarding on Surface Hub.
- Be confident that organizational data, proprietary thinking and student information is secure and compliant thanks to Windows 10's outstanding security measures.
