

With clients
With confidence
Without limits

One device to manage every document, so you can spend more quality time with your clients.

Surface for legal professionals

Surface is the single, core device that can replace not only your laptop and tablet, but also your filing cabinet, your in-tray, your printer and your legal pad. With Surface you can access the right document at the right time, from anywhere. Professional in appearance, simple to use and reliably secure, Surface helps you win back precious hours of your day. After all, the most valuable thing you have to offer your clients, is your time.

“We’ve replaced all fixed top computers, all telephones from the building... and we’ve replaced them with Microsoft Surface Pro computers... it allows our lawyers to work in a completely mobile fashion.

They can take a call on a headset with their Surface Pro and move around the building. They can pass into a meeting room and transfer those calls onto video conferencing facilities. They can transfer documents to be looked at by other people with the same technology, and they can be amended at the same time. You can do all of that without producing a ‘document’.

It will change the whole experience that clients have with their lawyers.”

Do more with Surface, Windows 10 and Office 365 together

Between clients meeting, taking calls, making notes, and reviewing documents, you don't have time to waste looking for the most up to date information. Your time is precious, and so is your client's information.

Surface has been designed to accommodate a schedule as varied and as demanding as yours. It has also been designed to make the most of the intuitive Windows 10, mobile-ready operating system and the cloud-backed power of Office 365. Now that document you need is just a click away- but still far out of reach from the wrong hands¹.

- **Meticulous craftsmanship:** Surface's premium finish reflects your professional image with an innovative design that leaves no detail unconsidered.
- **Connect in new ways:** Surface Dock lets you connect to external monitors, use all the apps you need at once, and switch effortlessly between them. Surface Pen makes digital inking feel as natural as pen on paper. Switch between tablet mode to laptop mode in seconds to review, edit, sign and secure documents without ever needing another device².

The right information. In the right hands

65% of small and medium sized-businesses struggle with keeping business data secured across devices⁴. Surface with Windows 10 and Office 365, makes it simple for you to access, edit, sign, file and share the right documents from anywhere. Without compromising your clients' confidentiality.

- **OneDrive and SharePoint:** Access the latest version of any document, edit it at the same time as your colleagues and 'rewind' to any previous version as needed.
- **InTune:** Remotely wipe any managed Surface device from anywhere if it is lost or stolen.

- **Reassuring familiarity:** Experience brilliant, business-ready features in a reassuringly familiar Windows and Office based environment that makes adoption easy for you, and your clients
- **Face-to-face from anywhere:** Skype for Business makes video meetings feel like a face-to face consultations³.
- **One-click collaboration:** OneDrive and SharePoint make document sharing and simultaneous collaboration just a click away with up to 1TB of storage in a secure cloud.
- **Industry-leading security:** Windows Hello uses biometric security to unlock your device with facial recognition and Windows 10 protects data from unauthorized access, viruses, and malware with automatic updates.

Out-of-the-box integration

Why waste internal resources and risk business downtime with multiple, incompatible devices and operating systems? You need a device solution that hits the ground running, that is fully compatible with your existing IT infrastructure, and that lifts the burden of support on your IT department.

- **Easy setup and management:** Surface is intuitive to use and simple to configure with existing tools such as Active Directory.
- **Smooth integration with existing investments:** It syncs seamlessly with other Windows 10 devices and platforms. Get more from your existing Microsoft investment with a device built to make the most of your existing infrastructure. Run custom applications and third-party software with ease.
- **Microsoft Surface Enterprise Management Mode (SEMM):** Your IT department can secure and manage the firmware settings across all of the Surface devices in your organization⁵.
